

Little Eden Entertainment Limited Risk Assessments

Putting up and taking down a Equipment					
What are the hazzards	Who might be harmed and how? Risk?	Likelihood	Level of harm	Action that will be taken to prevent this hazzard	Responsible person
		1=Not Likely	1= Minnor Injury		
		2= Likely	2=Moderate Injry		
		3=Very Likely	3= Serious Injry		
Equipment is very Heavy to lift	Those who are transporting the Item, Putting it up or taking it down could injure there backs	2	1	1)Only trained staff to move equipment, set up and pack down, 2) Advise will be given on the correct lifting procedures to prevent injury (using guidance from HSE	
Long Electric Cables	Other people could trip over them	2	1	Ensure cables are not lieing around causing trip hazzards	
Damage to Electric power cables	Anybody who touches the damaged Cable could be electrocuted	2	1	1)Unroll electric cable and check full length of cable and any plugs or sockets for defects 2)Ensure that the power cable is plugged into a power supply that has a trip switch 3) Ensure lead is PAT Tested	

heavy duty stakes are used to be driven in using hammer and removed at end of the hire	1) Operator hammering stakes could hit their hands 2)Others in the area could be hit with the mallet	2	2	1) Hold stakes half way down when hammering in 2)knock stakes sideways using hammer before pulling them out. 3)Make sure area is clear of people	
Equipment is wet when put away	The person packing away equipment could be injured if it's slippery or equipment heavier when wet	2	2	1) If possible equipment will be dried out before its packed away 2) Only trained staff will pack away equipment as per the manufacturers guideline.	

When using inflatables they must be supervised by an appropriate number of adults at all times					
What are the hazzards	Who might be harmed and how? Risk?	Likelihood	Level of harm	Action that will be taken to prevent this hazzard	Responsible person
		1=Not Likely	1= Minnor Injury		
		2= Likely	2=Moderate Injury		
		3=Very Likely	3= Serious Injury		
Adults & Older users jumping on the inflatables	1) Adults and older users could jump over the side of the inflatable 2) The seams of the castle could spilt causing it to deflate very quickly and injure those who are on it.	2	3	The height restrictions (varies dependant on the inflatable use and age restrictions of 14 years, unless adult grade inflatable), will be strictly enforced by those running the inflatable	
Larger users colliding with small users	Smaller users could be injured	2	3	Users should be grouped by age/ size and limited to an appropriate group size per session	
Users jumping off or falling off the front of the inflatable	Users could be seriously injured	1	3	1)Crash mats will be put at the front of the step of the inflatable. 2)At least one adult supervisor will at the front of the inflatable at all times, they will ask users to move back if they come to close to the front of the inflatable	

Users colliding with each other whilst on the inflatable	Users could be injured	3	1	Those supervising the inflatable will ensure that users do not bump into each other or become boisterous	
Sharp objects could puncture the inflatable	Users on the inflatable could be injured by sharp objects on the inflatable or if it inflatable suffers a puncture and deflates	1	3	1)The inflatable will not be set up on concrete or gravel and will be checked thoroughly before use. 2)Users will be asked to remove their shoes and other sharp objects before they go on the inflatable	
Anchor points become untethered	The inflatable could move or tip, causing injury to the users on it or anyone standing near it	1	1	1)The inflatable will not be inflated if the wind exceeds 24mph. 2)The inflatable will be tethered securely to the anchor points	
Anchor points and other equipment around the outside of the inflatable (e.g. blower)	People could trip over any of these items and injure themselves	1	1	The client will mark off hazards around the blower	
Inflation blower on ground near the inflatable	People could trip over the inflation blowers and injure themselves or cut the power and cause deflation	1	3	The client will mark off hazards around the blower	
Inflatable gets wet	Users might slip and injure themselves	2	3	1) The Inflatable will not be used if it rains and will be completely dried before being used again 2) food and drink will not be allowed on or near the inflatable.	
Using a generator to power electric blower	1)If other appliances are run from the generator there could be a reduction in power to the inflatable causing it to deflate 2)The Generator could catch fire injuring those near it	2	3	1) No other appliances should be plugged into the generator. 2) A fire extinguisher will be kept near the petrol generator	

People going on the inflatable after the event has finished and it is no longer being supervised	People could disregard the safety guidelines for safe use of the inflatable, and injure themselves or others. If they were injured there may not be anyone near by to help them	2	3	The inflatable will be supervised at all times that it is inflated and will be taken down as soon as possible after the event has finished	
Overloading or tipping the inflatable over	Heavier people could damage the seams and cause the inflatable to deflate and injure people	3	3	No users weighing over 90kg or 14 stone is permitted to use the equipment	
General use of a inflatable	Danger of unnecessary injury	1	5	1)Ensure that no one with a history of back and neck problems, suffers with a heart complaint uses the inflatable. 2)Anyone who is feeling unwell or suffering from the affects of alcohol, drugs or is pregnant may not use the equipment	

Use of a Photoboosts
